Application notes

Application Note : June 2021

Market involved : -

Product : DPD02, DPD Manager Apps

Customer : OEMs

Subject : Easy and safe relay settings

CUSTOMER ISSUE :

In many applications the user is tempted to tamper with the relay settings to reduce the number of undesired stops.

This can cause equipment failure and high repair costs.

Sealing the dials is not always the best solution.

OUR SOLUTION :

The DPD is fully configurable via NFC, so no dials are available for tampering. For additional security, the DPD can be locked with a 4-digit password.

BENEFITS :

- The relay trips correctly as set during the configuration, the monitoring functions are always effective and the equipment is protected.
